HIGH PERFORMANCE, FOR HIGH-DEMAND JOBS //

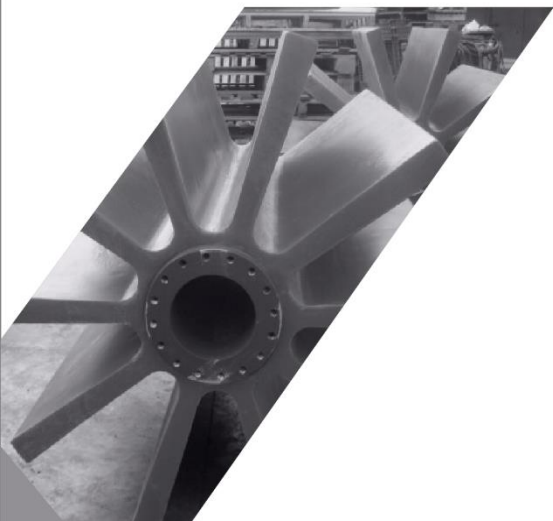

OUR COMPANY //

A vast experience in the mining and industrial production sectors positions us as an innovative and constantly growing company in the areas of metalworks and components manufactured from rubber, delivering comprehensive services and solutions to our customers for more than 50 years. We have our own formulations, facilities and machinery for the manufacture of products based on natural rubber, acryl nitrile, neoprene, butyl, EPDM, hypalon, viton, polyurethane, ceramic and other elastomers developed in our laboratory. Our production line comprises; coatings of special parts; Hoses for mining and industry, expansion joints, pinch sleeves and valves, molded parts, spools and steel equipment. We support the activities we carry out, under solid processes established by the guidelines given to us by our parent company REMA TIP TOP CHILE, which belongs to the German REMA TIP TOP AG, a leading supplier in the areas of material processing, surface protection and automotive, with a presence in more than 170 countries worldwide.

PHILOSOPHY //

We focus on satisfying the needs of our customers, with field service, developing products with an emphasis on innovation, reliability and quality, aiming to lead the market of rubber and metal rubber products, providing efficient solutions, based on the continuous improvement of our processes and systems.

COATING AND MANUFACTURING OF SPECIAL PARTS

MOUDLED PARTS

A REMA TIP TOP CHILE COMPANY //

LINNING

Pipes, Spools, Fittings / boxes / Gutters , Hoppers, Chutes / Trunnion / Tromel / Spout Feeder, Scoop Feeder / Power Block / Tanks / Pulleys & rollers.

HOSES, EXPANSION JOINTS AND PINCH SLEEVES

Hoses from 2" to 42" / Straight and preformed for the flow of mineral pulps and concentrates, cement and gravel / for suction and discharge of acids and alkalis / petroleum derivatives / Expansion and dilatation joint / Pinch sleeves and valves / Special designs of high performance rubber flexible ducts according to the customer's needs.

MOULDED PARTS

Rubber-ceramic Plates, Membranes, Bushings, Brackets, Valve Seats, Hydraulic and Pneumatic Seals, Support Plates, PML, Serrated, PSB and SB Skid Plates, Anti-Wear Plates with Ceramic and Special Steel Inserts, Screen Meshes and Screen Modules, Hydrocyclone Spare Parts, Flotation Cell Spare Parts, Extruded Profiles and Weatherstripping, Plate Gaskets with or without Fabric, guards, scrapers, shells, cable grommets, lifters and other pressed products.

STEEL WORKSHOP

Piping, Boilermaking, Metalworking equipment and metal structures.

ENGINEERING

Design and development of products, with cutting-edge 3D measurement and projection tools, with a focus on improving existing designs, under the reverse engineering methodology, proposing solutions and developing new designs, in this way, we generate efficient alternatives under the requirements of our clients.
